

Export

Command Reference

Table of contents

1 Description.....	2
2 Usage.....	2

1. Description

Export a set of packages.

The export command finds the set of package objects associated with the required buildstamp and uses there get and upload commands to export the package files to a file or WebDAV based location.

2. Usage

```
ctl -t Builder -o <objectname> -c Export [-buildstamp <>]
```

2.1. Workflow

1. [repoFind](#)
2. [repoExport](#)
