

scmCheckout

Command Reference

Table of contents

1 Description.....	2
2 Usage.....	2

1. Description

Run the checkout command.

Checks out files into `-basedir` of `-module` via the `-connection` using method `-binding`.

2. Usage

```
ctl -t Builder -o <objectname> -c scmCheckout [-basedir <>]
[-binding <>] [-buildstamp <>] [-command <checkout>]
[-connection <>] [-label <>] [-module <>] [-quiet <>]
[-revision <>]
```

2.1. Options
