1. Overview

TomcatZip: *Zip archive of Apache Tomcat*

This type allows for the installation of Tomcat on a ControlTier node. Refer to objects/sample.xml for example package definitions to use in ProjectBuilder. Attach this package as a child object of TomcatServer in order to install Tomcat when the service is deployed. You may also attach this package to TomcatAntBuilder for build processes that require a copy of Tomcat to be present.

2. Design

Super Type

[PlatformZip](#)

Role	Concrete. (Objects can be created.)
Instance Names	Unique
Notification	false
Template Directory	
Data View	Children, proximity: 1
Logger Name	TomcatZip
