## 1. Overview

**AtgPlatformZip:** *Standard platform zip format package*

## 2. Design

### Super Type

zip

|                    |                                            |
|--------------------|--------------------------------------------|
| Role               | <b>Concrete.</b> (Objects can be created.) |
| Instance Names     | <b>Unique</b>                              |
| Notification       | <b>false</b>                               |
| Template Directory |                                            |
| Data View          | Children, proximity: <b>1</b>              |
| Logger Name        | zip                                        |

## 3. Constraints

## 4. Commands

### Note:

Commandline options displayed in square brackets "[]" are optional. If an option expects arguments, then angle brackets are shown after the option "<>". Any default value is shown within the brackets.

### 4.1. finish

*finishes the package installation*

#### Usage

```
finish [-filename <>] [-filtersfile <>] [-installroot <>]
```

#### Options

| Option      | Description                  |
|-------------|------------------------------|
| filename    | <i>path to package file</i>  |
| filtersfile | <i>property file</i>         |
| installroot | <i>installation root dir</i> |
