

# create-project

## Command Reference

### Table of contents

1 Description.....	2
2 Usage.....	2

## 1. Description

Create a new project in the repository. (*deprecated*)

Deprecated. See: `ctl-depot -a create`

Creates a new Workbench project. Takes arguments to optionally load type library and data, as well as, create a corresponding CTL project depot.

*static*: This command can be run outside of an object context.

## 2. Usage

```
ctl -m ProjectBuilder -c create-project [-description <>]
[-jar <>] [-organization <>] [-project <>] [-projectxml <>]
[-setup]
```

### 2.1. Options
