2 Usage.....	2

1. Description

Start the service process.

Service provides the concrete implementation supporting the generic start up algorithm which first checks if the service is up and if not, to then run the startService method.

2. Usage

```
ctl -t Service -o <objectname> -c Start
```

2.1. Workflow

1. [assertServiceIsUp](#)

2.2. Error Handler

Command	startService
