

assertServiceIsDown

Command Reference

Table of contents

1 Description.....	2
2 Usage.....	2

1. Description

Confirm the service process is down.

The assertServiceIsDown command is a hook command overridden by subtypes providing a service specific check to determine if the service is not running.

2. Usage

```
ctl -t Service -o <objectname> -c assertServiceIsDown
[-executable <>] [-script <>]
```

2.1. Options

Option	Description	Type	Default
executable	<i>executable to run</i>	string	<code>\${entity.attribute.service-isd</code>
