

runTestScript

Command Reference

Table of contents

1 Description.....	2
2 Usage.....	2

1. Description

Invoke the test tool.

The runTestScript command is a hook command overridden by subtypes providing a Updater specific procedure to test the manage Sites after the Deploy workflow completes.

2. Usage

```
ctl -t Updater -o <objectname> -c runTestScript [-buildstamp
<>] [-executable <>] [-script <>] [-spawn <>]
```

2.1. Options
