1. Overview

HudsonWar: *Hudson continuous integration server war package*

This type installs an unexploded hudson.war file into the installroot. If using Hudson's default servlet container Winstone, this will be HUDSON_HOME; otherwise, it will be the webapps directory of the servlet container. Besides constraints, it is just like its more general sister type, PackedWar.

2. Design

Super Type
war

Role	Concrete. (Objects can be created.)
Instance Names	Unique
Notification	false
Template Directory	
Data View	Children, proximity: 1
