Docs-Generate

Command Reference

Table of contents

1. Description

Generate the Apache configuration file

Uses templates to generate the httpd.conf file; also generates proxy_ajp.conf if a TomcatServer is a dependency.

2. Usage

```
ctl -t ApacheSystemService -o <objectname> -c Docs-Generate
[-ajpPort <>] [-proxyAjpLocation <>] [-proxyAjpWebapp <>]
[-serverRoot <>]
```

2.1. Options
