runBuildScript

Command Reference

Table of contents

1. Description

Invoke the build tool.

Executes make (resolved from the PATH) from the base directory with the specified make file (default "Makefile") and target (default "all") after setting the BUILDSTAMP environment variable.

2. Usage

```
ctl -t MakeBuilder -o <objectname> -c runBuildScript [-basedir
<>] [-buildfile <>] [-buildstamp <>] [-target <>] [-targetdir
<>]
```

2.1. Options

Option	Description	Type	Default
