

writeBuildProperties

Command Reference

Table of contents

1 Description.....	2
2 Usage.....	2

1. Description

Write out properties file for use in Hudson

Uses a template to write out a file with properties that can be read by Ant during the build. This location is passed to Ant from the Hudson config.xml generated by #generateHudsonConfig

2. Usage

```
ctl -t AntBuilder -o <objectname> -c writeBuildProperties
[-buildstamp <>] -file <>
```

2.1. Options

Option	Description	Type	Default
buildstamp	<i>build identifier</i>	string	<code>\${entity.attribute.buildstamp}</code>
file	<i>Absolute path to the Hudson xml fragment temp file</i>	string
