

move

Command Reference

Table of contents

1 Description.....	2
2 Usage.....	2

1. Description

Moves/renames a WebDAV-resource.

The move operation is the logical equivalent of a copy followed by a delete of the source.
Works on individual resources and collections. RFC reference: [MOVE Method](#)

static: This command can be run outside of an object context.

2. Usage

```
ctl -m davutil -c move -dest <> [-password <>] -url <>
[-username <>]
```
